Subject: Re: WR Mine Water NOV and Division Order on Roads

Gary, thank you. I gave the fax to Gregg to look at on Tuesday morning. He spent several hours on it that morning to help West Ridge avoid an FTA/CO situation. We didn't know that there were still more changes until later - which means that his time could have been spent reviewing other items until the final corrected submittal came in (which you brought up in the afternoon). Gregg spent lots of time (frustrating time) just trying to figure out the submittal which was not submitted correctly with the C1/C2, etc.

In the interest of the best use of resources, please follow the Submittals Format Guide (attached) (that means you are responsible for inserting all of the submittals here at the Salt Lake Office.) Appreciate it.
Pam

I am bringing up permit changes for the above this afternoon. I e-mailed Karl that we piped the mine water to its UPDES 002 discharge point last Friday. This will avoid the FTA situation that has been driving us.
