RE: Genwal Resources, Inc. "Crandall Canyon" Mine - Application for a Permit Revision
Surface Facility Map

*Frederick &
C/O 15/0032*

Dear Sir or Madam:

This in response to the Utah Division of Oil, Gas, & Mining's (UT-DOGM) November 22, 2004, request for a decision, under 30 CFR 944.30, whether the above subject permit revision constitutes a mining plan modification.

Mining plan approvals by the Secretary of the Interior are required under the Mineral Leasing Act of 1920, 30 U.S.C. 181, *et seq.* before coal mining can occur on Federal lands. This letter serves to document OSM's determination whether or not a mining plan approval from the Secretary is required for the above permitting action.

OSM's review of the Application for a Permit Revision, Surface Facility Map, has determined that it proposes to update the Surface Facility Map to depict changes in the upper pad/coal storage pad and the placement of three portable buildings associated with contractors working at the Crandall Canyon mine, Utah State permit C/015/032.

Based on a review of the activities associated with the permit revision, OSM has determined that the proposal does not meet the requirements of 30 CFR 746.18(d). Therefore, the proposed permit revision does not constitute a mining plan action requiring Secretarial approval. ✓

OSM's decision was based solely upon the Federal regulations under 30 CFR PART 746 and not the technical aspects of the revision application itself. Consequently, OSM's decision does not relieve UT-DOGM from coordinating the review and approval of the Application for a Permit Revision, Surface Facility Map with other Federal agencies for compliance with other Federal regulations.

OSM also electronically transmitted the November 22, 2004 request to the Bureau of Land Management and the U.S. Forest Service for their review and comment.
