Subject: FYI - Crandall Drill Holes

CC: Grubaugh-Littig, Pam

The Sheriff's office reports that one family ceremony was held at the #7 drill pad on Monday. A second ceremony will be held this Friday. Dave Shaver has a requisition in to plug the drill holes and when that is approved, its expected to take another two weeks for Lang Drillers to mobilize. Plugging the holes will require re-opening the mud pits.

Question: Can work on interim stabilization of pads 6, 7, 1, 2, and 5 begin? i.e. grading the pads to the slope and creating a ditch to the mud pit, but not extending the ditch beyond the mud pit?

Thanks Tom for the wood fiber sample you delivered to the DOGM Price Field Office. Dave came by and looked at it and has the specifications. I think it would add strength to the regraded slopes if it is gouged in.

A few comments were made on the draft 09/07/07 meeting notes. So they will be finalized and sent to the Division files. I will forward a final copy to you by email.
