Enclosed is the latest information I have on the new location of the 4th drill-hole. This hole has been relocated in response to the underground noise that was picked up by the geophones yesterday in drill-hole #3.

Subject: Drill Hole #4

Hi Dave -

We have had a change of plans for our next drill hole (#4). We are moving it from Entry #1 at Crosscut #133 to Entry #4 at Crosscut #143. It will be approximately 520 feet directly east of Drill Hole #3 (our last drill hole). It will still be an 8" hole. We did prepare a pad at Crosscut 133, but at this time we may not drill there.

I will let you know if any other information becomes available.

Thanks,
PJ Jensen
