 Jeff - we have not received the notice of temporary cessation yet from Genwal Resources. We will let you know when we receive it.

Pam

Thanks for the copy of the letter. For the following issues the mine is planning to place concrete block stoppings in the portals to prohibit entrance by unauthorized persons. Also, they said metal portal barricades or barred doors, along with a chain link fence, and an onsite 7 day 24 hr guard will be used to restrict access to the stoppings. Also, they will plan to use a system of above floor ditches to direct underground water flow to the existing mine discharge system.

Please let us know if you have any questions.

THANKS...

 Subject
 Requirement for Temporary Cessation
 of Operations - Crandall

Attached is a copy of the letter we sent to Genwal Resources on September 6, 2007 reminding Genwal of the requirements under the Utah Coal Regulatory Program to notify the Division of Oil, Gas and Mining if there is a temporary cessation of operations at the Crandall Canyon Mine.

(See attached file: 20070919122509.pdf)
