Internal
d/015/0032 *OK*

Dave Shaver informed me today that the water level at the Crandall Canyon Mine has reached the North Portals and is discharging. Some of the water is going out the approved UPDES point for mine water. A portion of the water however is entering the sediment pond. I do not have any other information at this time, but plan to be there tomorrow. Dave contacted DEQ as well. He was planning on being at Crandall this afternoon and meeting Karla Knoop, JBR, in case water samples were necessary. I will keep you informed as information is available.

Thanks,
Karl
