Subject: Bond at Crandall Canyon

As you know the renewal for the Crandall Canyon Permit is due on May 13, 2008. One of the findings that we need to make in order to renew the permit is found at R645-303-233.150. This rule requires that a reclamation bond be in full force and effect for the period of the renewal. We have discussed the need to provide the additional \$407,275 bond to cover the reclamation of the East Mountain Drill sites as well as escalation of the bond to 2011 year dollars. We indicated in our correspondence of April 9th the need to have it posted by the end of April. We are now approaching the May 13th deadline for renewal of the permit and have yet to receive the required bond. Without the bond being in place, we may be unable to renew the permit for the Crandall Canyon Mine. We encourage you to take the necessary steps to secure the bond by May 13th so that the permit renewal can go forward. Please call me at (801) 538-5325 if you have any questions.
