**Subject:** Fwd: Crandall macroinvertebrate studies

hello-

Can you please put this on the CTS under task 3366. Thanks!

Hi Ingrid....Please be advised that we have asked JBR Environmental Consultants to begin doing the macroinvertebrate studies in Crandall Creek, as required by Citation 10044. JBR is well qualified to do the work and is presently doing similar studies for some of the other mines in the area. Karla Knoop will be coordinating the effort. I have asked her to contact you directly to get the project focused. I believe you have already had some contact with both Forest Service and DWR regarding this issue, and perhaps you can steer Karla to the right people in these agencies so that everyone is on the same page as to the expected protocol for the upcoming studies. Karla will probably give you a call on Monday to kick things off. Thanks

Dave
