OK

Pam,

Is the Forest in agreement with this? Are you willing to revise the two Special Use Permits that Genwall Resources has in their reclamation plan?

As I told Mr. Faddies, we will gladly accommodate this for this year, providing the Forest will update their Special Use Permits. However, I don't envision keeping it open for as long as a land exchange may take. I hope there is some comfort level that your two agencies can reach that will help us to move along on the reclamation.

We will continue to work with you and SITLA to ensure that our efforts are not at cross-purposes with yours, but hope not be put into a situation where we must decide between competing interests.

Thanks,
Dana
