**Place:** OGMCOAL

Dave,

As we discussed yesterday during our inspection a summary of the deadline dates and requires are shown in this e-mail.

Thanks,  
Karl

Just a reminder violation 10043 abatement requires an operational plan be submitted and approved by the Division by September 17 and implemented by October 19. Final reclamation plan is required by October 19. Violation 10044 is due September 30 and requires macro invertebrate study to be completed.

>>> Daron Haddock 9/9/2009 4:26 PM >>>

FYI--It looks like they are making some progress. I assume that Dave will be getting some plans to us that describe what they are doing.
