Subject: RE: Crandall Canyon- Water Treatment Facility
Place: OGMCOAL

Morning Dave,

Sounds good. Please note that the performance/design standards outlined in R645-301-533, -733, -743, and -744 will need to be fully addressed in the submittal. I'm sure you're well aware of it, but there is a considerable amount of information that will need to be submitted for final MRP approval of the treatment facility that was not contained in the plans that were e-mailed to the Division on 09/16/09. Feel free to call me with any questions you might have.

Thanks Dave,
Steve

Hi Steve...I am working on the submittal for the treatment facility as we speak, and hope to hand deliver it to you or Daron this Thursday
Dave

Dave,

The water treatment project currently under construction at the Crandall Mine was discussed this morning at our staff meeting. I understand that it's been agreed that construction of the water treatment facility will proceed with a formal MRP submittal to follow. That is still the case.

However, prior to the bringing the system on-line and diverting water to the settling pond, the Division requests that, at a minimum, you submit the design drawings and plans (submitted via e-mail on September 16th, 2009) with a signed and dated professional engineer certification.

If you have any questions, please call me or Daron Haddock (801) 538-5325.

Regards,

Steve
