Dave,

Thanks for sending that. It looks good to me. Go ahead and incorporate those changes into the clean copies and we'll get this approved. What's your schedule looking like in terms of getting the clean copies submitted? That question has been posed to me by 3 different people today and it's not even lunch time! Anytime this week will be fine. If Division folks end up coming down this week to see the facility, perhaps we could do a hand off then. Let me know how it goes and we'll figure something out. I do have a copy of the #3415 amendment and one copy of the most recent amendment #3455 if your intention is to use those. We could mail those to you, but you wouldn't get them until Wednesday at the earliest. Let me know what you'd like me to do.

Thanks Dave,
Steve

Hi Steve...Attached is a copy of the page wherein the language has been changed regarding use of the flexible hose to bypass around the settling basin rather than have it run down the road. Also attached is the computer backup that shows that an 8" hose will do the trick. I just wanted you to see it before you get it, even though we already have the conditional approval. Thanks for your cooperation on this matter Steve. With a bit of luck we should be operational by the end of this week.

Dave
