Subject: Conditional Approval of Mine Treatment Facility, Genwal Resources, Inc., Crandall Canyon Mine, C/015/0032, Task ID #3461, Outgoing File

Dear Mr. Shaver:

The Division of Oil, Gas and Mining has completed its technical review of the above-referenced amendment and hereby grants conditional approval of the amendment. Upon satisfying the following conditions, final approval will be granted:

- Receipt of eight complete clean copies (6 of these copies must be paper-the other 2 may be on CD).
- The Permittee must revise the maintenance portion of the application based upon discussions with Division staff on January 6, 2010. The revisions to the maintenance plan for the Maelstrom Oxidizer Unit must discuss how an 8" mine hose will be located at the site and utilized to safely convey the mine-water discharge around the water treatment facility during periods when the system must come off-line for repairs/maintenance. In addition, the Permittee must provide the supporting calculations that the 8" mine hose is adequately designed to convey the design flow.

Please submit the additional information and requisite clean copies no later than January 14, 2010 in order to expedite the initiation of water treatment at the site.

A stamped incorporated copy of the approved plans will be returned to you for insertion into your copy of the Mining and Reclamation Plan.

If you have any questions, please call me at (801) 538-5325 or Steve Christensen at (801) 538-5350.

Sincerely,

Daron R. Haddock  
Permit Supervisor
