Subject: Final Approval of Mine Treatment Facility, Genwal Resources, Inc., Crandall Canyon Mine, C/015/0032, Task ID #3461, Outgoing File

Dear Mr. Shaver:

The above-referenced amendment was conditionally approved on January 11, 2010. Final approval was predicated on the following conditions:

- Receipt of eight complete clean copies (6 of these copies must be paper-the other 2 may be on CD).
- The Permittee must revise the maintenance portion of the application based upon discussions with Division staff on January 6, 2010. The revisions to the maintenance plan for the Maelstrom Oxidizer Unit must discuss how an 8" mine hose will be located at the site and utilized to safely convey the mine-water discharge around the water treatment facility during periods when the system must come off-line for repairs/maintenance. In addition, the Permittee must provide the supporting calculations that the 8" mine hose is adequately designed to convey the design flow.

The conditions have been met. The maintenance portion of the application has been revised and clean copies of the amendment were received on January 25, 2010.

Thank you for your help during this process. If you have any questions, please feel free to call me at (801) 538-5262.

Sincerely,

James D. Smith  
Permit Supervisor
