Bill,

Thanks for doing that. I appreciate it.

Regards,
Steve

Steve,

Please review the attached document regarding replacement equipment costs for the chemical application at Crandall Canyon.

Regards,

Subject: Nalco Make-Down Unit

Bill,

Per our phone conversation this afternoon, I wanted to shoot you an e-mail regarding the make-down unit at

Crandall. As I explained on the phone, we're working on a cost break-down for the entire water treatment system at Crandall in the event that the State of Utah ever had to operate it.

As part of that effort, replacement costs for equipment is one of the components we're trying to get a handle on. If you would, please forward me the cost information for the make-down unit as well as it's associated components.

Thanks for you time.

Regards,
Steve
