I left a voice mail on Dave Shaver's system at 8:44 AM on 2/7/2011 that the deposition of iron laden sludge from the Crandall Canyon Mine water treatment system into Pond "C" at Wildcat Loadout C/007/033 was to be discontinued immediately.

This is due to the determination by the Division that this sludge should not be placed in the Centennial Pond "A" either. Kevin Lundmark notified me of this a few minutes before I called Mr. Shaver.
