## **2. Signs and Markers**

Mine identification sign is located at the point of entrance into the permit area from the USFS road. The sign is tipped forward, but has been wired to a jersey barrier. The sign contains the required information.

### **4.a Hydrologic Balance: Diversions**

Diversions are open and functional. Removed a piece of tarp from the diversion adjacent to the iron treatment building. So that the material would not plug the culvert inlet.

### **4.b Hydrologic Balance: Sediment Ponds and Impoundments**

Water is present in the sediment pond. Cooler temperatures have placed a sheet of ice on top of the pond surface.
