CC: OGMCOAL

Good afternoon,

I wanted to ask you if you knew what the status was of the proposed Crandall Canyon iron sludge disposal site on the SITLA property just east of the power plant? I have a meeting with Dave Shaver on Wednesday and the topic will come up. The last time I spoke with Mr. Shaver about it, he indicated that the permitting process was on-going with SITLA; however, that was several months ago.

Regards,
Steve
