Steve,

The issuance of the lease has been approved by our Director. I forwarded a copy of the lease agreement to Genwal last week and am waiting for them to execute and return. Once it is returned our Director will execute the lease and everything will be finalized.

Thanks,  
Chris

Good afternoon,

Sorry to bother you again. I just wanted to check in and see what the status is of the SITLA lease for the Crandall Canyon Burma Rd iron sludge pit. If you get a second, shoot me an e-mail. The reason I keep inquiring about this, is that the primary pond at the mine site is less than an ideal receptacle for the generated sludge.

Regards,  
Steve
