Good morning Jay,

Attached is the final approval letter for the Crandall Canyon- Burma Evaporation Pond. Give Daron or myself a call if you have any questions. A hard-copy of the entire package has been mailed to you.

Regards,
Steve

Subject: Final Approval of Construction of Burma Evaporation Pond and Revised Permit Document, Genwal Resources, Inc., Crandall Canyon Mine, C/0015/0032, Task ID #4163

Dear Mr. Hibbs:

On October 22, 2012, the Division conditionally approved your application, upon receipt of clean copies, for Construction of the Burma Evaporation Pond which also included a change in the permit boundary for the Crandall Canyon Mine. We received the clean copies on November 2, 2012. The Burma Evaporation Pond Revision hereby receives final approval. Enclosed is a stamped incorporated copy for insertion into your copy of the Mining and Reclamation Plan

Also enclosed along with the Division's Decision Document are two (2) copies of the revised permanent program permit for the Crandall Mine, which include the Burma pond. Please have both permits signed by the designated signatory authority and return one signed copy to the Division. You should note the permit conditions and that the expiration date of the permit did not change but remains May 13, 2013.

We also remind you of your commitment found on page 11 of Appendix 7-65, that the Burma Evaporation Basin must be constructed and operational within 60 days of the date of this letter. Additionally, the continued use of the primary sediment pond at the Crandall Canyon Mine for iron sludge disposal will no longer be authorized at that time. Failure to meet these permit commitments will result in enforcement action.

Thank you for your help in completing this important permitting action. If you have any questions, please call me at (801) 538-5334 or Daron Haddock at (801)538-5325.

Sincerely,

John R. Baza
Director
