Mr. Boehms,

By this email I am requesting an extension to the time required for response to TDN #X12-140-933-001 to the full 30 days you are allowed to do so. This would make the response due on January 23, 2013.

Because the Division cannot take further action with regard to the Crandall Canyon Mine long-term bond situation without consideration of this matter by the Board of Oil, Gas and Mining, and because the TDN is directed to certain provisions of the Board's March 6, 2012 Order, the Board should have an opportunity at its next meeting to weigh in on our response. The Board will next meet on January 23, 2013 and this matter has been placed on its docket.

The Division's response would be electronically transmitted to OSMRE on January 23.

Thank you for your consideration.

Dana Dean, P.E.  
Associate Director - Mining  
Utah Division of Oil, Gas and Mining
