Hey there Erik!

I know you've been super busy lately, but as the year draws closer to an end (where did it go?!), I am still in need of the isotopic data results for carbon-14, deuterium, oxygen-18 and tritium from 2nd and 4th quarters of 2013 and 2014 so I can enter the data into the DOGM Database. The only lab result sheets I have been given are 2nd Quarter 2013 for deuterium, carbon-14 and tritium.

If you could forward me the results for 2nd quarter oxygen-18, and all results from 4th quarter 2013 and all of 2nd quarter 2014 and 4th quarter 2014 (if they're available) so I can complete the task for DOGM, I would really appreciate it.

Thanks, and have a great weekend!
