Karin

As per our phone call this afternoon, it was mutually decided that the fire teams operating in the vicinity of the Crandall Canyon mine site could have unfettered access to the areas behind and adjacent to the mine structures. It was understood that the ground crews working in advance of the fire line would be clearing vegetation and other flammable debris in order to prevent the fire from igniting any structures within the permit area.

Thanks again for the update, and keep me posted when you are able,

### **Justin Eatchel**
