Thank you Pam,

I would be happy to assist DOGM with this.

Best,  
Lori

Lori - The Division received a permit application from Alton Coal Development, LLC for the Coal Hollow Mine (on fee lands) on June 14, 2007. This is a formal request for PLPCO to review the cultural survey and mitigation plan prepared by Montgomery Associates for those fee lands under this application (these plans are confidential - the cultural survey starts on page 69.) Your expertise as an archeologist is requested for the review.

The Coal Hollow Mine is near Bryce Canyon and is in an area where cultural sites are located. Due to the sensitive nature of this project, we are requesting your expertise.

I appreciate your help with this.

Thank you.

Pam
