I am a tourist that spends time in Panguitch Utah. With the big trucks coming through town at all hours of the day and night it will be very distrubing to the town and folks coming in and out of town. This has always been a quiet place to walk and enjoy the surroundings. Putting trucks (no matter how slow) will leave the roads full of congestion, dirt, rocks, and diesel smells. Panguitch will not be a quiet place to love anymore. I know the route is already there but I am also sure that the committee can figure out another route around Panguitch.

Thank you for your time and effort on behave of the citizens of Panguitch and all of us that are tourists during the year.
