Subject: Re: Technical Memorandum of May 29, 2008
Place: OGMCOAL

B

Hello Ms. Bryant,

The memos were held in a draft file until after the informal conference and until all review team members had completed their reviews and the deficiency list was finalized (Aug. 4, 2008). At that time, information from the draft memos was compiled into a Technical Analysis document (dated August 26, 2008). After which, the draft memos were finalized and sent to the final file. The date on the memo probably reflects an early draft of that memo, and revising the date was most likely overlooked when the memo was finalized and sent to file.

Priscilla - I was in the UOGM website and found the above dated TM that had been added to the Internal File section in November of this year. It has an excerpt of the comments I made at the Informal Conference June 16, 2008. The comments shown from me was just a portion of the comments made. I am concerned that it didn't include my statements regarding air quality, water quality, economic impacts, visitor ship to our immediate area, traffic, etc. BUT my question is how did my partial comments made on June 16 of this year become part of this TM which has a May 29 date - approximately 17 days before I made these comments. I hope you can clear this up for me. Thanks
- Bobbi Bryant
