SUBJECT:

As a new resident to Utah, we were extremely disappointed to find out there is a potential strip mine being considered for southern Utah! Can't believe that with all the new technology there is even a consideration for an energy source that will pollute and endanger the residents and visitors in the southern and central part of the state. We are the poorest county in the state and don't have the resources to have this kind of pollution. Our air quality, water, highway traffic, wildlife, and tourism will be destroyed by this strip mine. Our plans are to attend the meeting in Panguitch on October 6th. Please reply to this email and explain why our state is even considering this venture.

Sincerely,

Cornellia Jones, owner and resident of Piute County
