Kirk,

Thanks.

I still do not see any dialog that addresses foundation preparation, need for under drains (if necessary), instability, structural weakness or other hazardous conditions. An additional requirement is that the report that has dialog (may include pictures) is to be submitted to the Division promptly after each inspection (R645-301-514.120). to date this has not occurred. As we discussed on the phone today the violation has been issued and terminated. If you feel that this violation was issued wrongly the only recourse at this time is to request a fact of violation conference (please see the second sheet of the violation that outlines the process and your rights).

Thanks,
Karl

Karl,

This is a copy out of the as-built report that you were looking at here at the office.

Thank You

Kirk Nicholes
