Subject: Lower Robinson Creek Diversion channel repair, Alton Coal Development, Coal Hollow Mine, C/025/0005.

Dear Mr. Haddock,

As noted in the Divisions March 20, 2012 letter the Lower Robinson Creek Diversion is in need of maintenance from the beginning point of the Diversion to the Bend. As this is the live stream channel, in order to minimize additional sediments being mobilized, Alton Coal Development will place 3" to 6" Rip Rap in the bottom of the channel to insure stability of the channel until the reconstruction of Lower Robinson Creek.

Please let me know if you have any questions or concerns. I can be contacted at (435) 691-1551

Sincerely,

B. Kirk Nicholes
Resident Agent
