Thanks Karl. I was going to ask them to revise Map 5-10 to show 1st year (2011), 2nd year etc. Since they have not mined all they expected as shown for the first year on map 5-10. Do you agree?.

Priscilla,

I finally got through all of my e-mails from being off. I had an e-mail from Steve Christensen on 12/20/2011 relative to Coal Hollow 1 year mining sequence. I checked the CTS (Task #3990) and it looks like your the lead. I am assigned as the inspector and I know that Steve invited others to comment if they felt it necessary.

As the inspector I have pulled up their submittal letter and the associated map (Drawing 5-10). This request identifies the location of pits 4, 5, 6, 7, and 8. Pits 9, 10, 11, 12 and a portion of 13 remain the same for Year 1. As the inspector I do not not have a problem with the requested designations of mining sequence for pits 4, 5, 6, 7 and 8 being approved.

Thanks,
Karl
