2. Signs and Markers

Observed the mine identification sign at the entrance into the permit area. The sign contained the required information.

Found a stream buffer zone sign that has slid to the base of the pole it is mounted on. The sign needs to be raised and secured.

9. Protection of Fish, Wildlife and Related Environmental Issues

The T&E survey the mine has completed was reviewed by those in attendance. The two fish T&E species listed, Humpback chub and Bonytail, were not impacted by the mine as the mine is not located in a watershed that contributes to the Colorado River above the Glen Canyon dam. Section 322.210 of the MRP includes the T&E species surveyed for the mine.

22. Other

Pit #4 overburden is almost all stripped in preparation for mining. Mining is still taking place in pit #5. Reclamation of pit #5 should begin in the next couple of weeks.
