Hello Mr. Parslow,

I am writing to inquire whether or not a soil survey has been published for the Alton, Utah area as of yet? My agency is the lead agency in the environmental permitting of the Coal Hollow mine site. Our records indicate that back in 2009, NRCS was actively involved in an study to gather data for publication of a soil survey. I was just curious if the study has been completed at this point and if data are available online?

Any help you could provide would be appreciated.

Sincerely,

April Abate

April A. Abate
