Subject: DOGM Assignments
CC: April Abate; Dana Dean; Daron Haddock; Erik Petersen; Karl Houskeepe...

Good morning,

As you know, April Abate and Ken Hoffman have been co-hydrologists for Coal Hollow since Ken came on with the Division several months ago. The purpose of this e-mail is to clarify the individual hydrology duties for Coal Hollow.

From this point on, Ken will be the contact person for hydrology issues relative to the more "day to day" aspects of the site. By "day to day" I'm referring to permit amendments, water quality issues/reports, site inspections etc. Here is Ken's contact information:

kenhoffman@utah.gov
(801) 538-5345

April will be the lead hydrologist on issues regarding the EIS/Lease expansion. April will coordinate the field reconnaissance work in May with the other regulatory agencies and stakeholders. Additionally, April will be the lead hydrologist in terms of working with you on baseline data collection, water monitoring, permitting considerations etc. as the lease expansion process moves forward.

If you have any questions, please feel free to contact me.

Regards,
Steve
