Hi Nathan,

Just finished compiling my photos from the trip yesterday. Here are the photos you had asked for relating to the Lamb Diversion WR #: 85-305, 85-71. I would be interested in being kept in the loop on your findings for this water right and if they are found to be over using. I know that you mentioned that they are likely within their right to divert the amount of water that we observed yesterday.

Thanks for coming on the trip with us yesterday. I hope you found it to be informative. We still have a long road ahead of us as far as permitting goes. We'll have to see what develops!

Thanks again,
April

April A. Abate
