Hello Jeff,

Daron has asked me to forward the Coal Hollow, IBC and Highwall Mining, Task ID #4444, application to you.

Unfortunately, our ftp site is down and emailing it has failed, it is just too large...however, these files have been scanned for public access.

If you follow the link:

<http://linux1.ogm.utah.gov/WebStuff/wwwroot/coal/filesbypermit.php?C0250005>

All of the documents dated "20131101" are associated with this application. There are quite a few maps. Ogmguest username and password will let you view the files.

Also, if you click control + f and type "20131101" into the find box, all of these files will be highlighted.

Hope this helps.

Let me know.

Thanks
