Hello Keenan,

This e-mail is to inform the Division that the 2nd quarter 2015 water monitoring information for the Alton Coal Development, LLC Coal Hollow Mine has been entered into the Division's on-line coal water quality database and is ready for upload. This includes the regular water monitoring and UPDES monitoring information.

Also, I attempted to input the data for two sites that are not available within the Division's database. This information is listed below:

Well Y-100, monitored on 6/29/2015 at 16:30, the measured water level was 88.28 feet below the top of casing, with a water elevation of 6991.23 feet

Well Y-101, monitored on 6/28/2015 at 14:10, the measured water level was 34.18 feet below the top of casing, with a water elevation of 6982.61 feet

Thanks,  
Erik
