Drew,

Would it be possible to get a clipped version of the pre-mining topography contours, the existing topo, and reclamation topo within the permit boundary in a .dwg ? I've gone through and essential rebuilt the majority of your figures and the contour information would be helpful in determining the slope of the dozer's grading and various material hauling to assist with my costing. Right now I'm stuck using the printed version and an engineering ruler. A digital version would speed things up immensely.

Hopefully I'll have some better numbers to share with you within the next couple weeks.
Thanks,

Cheryl Parker, M.S., P.E.
