In accordance with the provisions of the Utah Coal Mining and Reclamation Act, Utah Code Ann. § 40-10-1 et. seq. (Act), the above referenced Citation is:

Modified as follows:
The abatement date is extended to April 11, 2015.

Reason for modification:

An e-mail request for an extension of time to respond to the citation was received on March 12, 2015. The abatement date is extended because although the Permittee responded with engineering calculations for the channel as-constructed before March 12, 2015, the Division's initial review found the design storm event was incorrect. In accordance with R645-301-742.320 et seq, the design storm event for Lower Robinson Creek, a permanent diversion, must meet the 100 yr, 6 hr storm and must be able to pass the calculated design storm flow of 347 cubic feet per second as outlined in Appendix 5-3.
