Kirk,

Following up on our conversation, here's the discussion points to add to the amendment prior to approval. Talk to Priscilla or Daron about the abatement deadline. It should probably be extended so I have time to approve the amendment in a findings report.

- 1) Extend beginning point of reconstruction north to the permit boundary in Figure 1 and Figure 2. Starting elevation of 6868' (from Figures 21, 21A in approved MRP).
- 2) Channel slopes will be seeded every year once final grade is established until vegetation cover is adequately established.
- 3) Label Dan Guy's report with business name, contact and date.
- 4) Delete the narrative about planting willows. They'd probably be difficult to establish and are not in the natural channel below the permit area.

Officially submit the amendment through Suzanne and I'll try to get the review through by late next week.

I appreciate your help with getting this done.
