Subject: North Lease area-- Baseline monitoring
To: Erik Petersen <petersen@relia.net>, Kirk Nicholes <knicholes@altoncoal.com>

Erik,

I called your phone and it went to voice mail, so I'm following up by email.

I'm currently reviewing the North Private lease area application and have concerns about the current baseline surface water monitoring locations. There does not appear to be a Kanab Creek surface water monitoring location that is solidly within the permit area. It will be important to monitor the creek at one or more locations as it passes through the permit area to help home in on any disturbance that may occur along its length.

I wanted to give you a early heads up about this while we are still in the review process. Please give me your input about how we may solve this.

Thanks,
Keenan Storrar
