Hello Pricilla,

For NOV 21162, the hose extension on the downstream side has been removed and the pipe extended into the pond. Geo-fabric and Rip-Rap has been installed at the end of the pipe. And the trench has been backfilled. The second pipe was removed from DD4 and extended over the Red Dog hill and tied into the first pipe continuing to the apron, thus only one pipe enters Pond 3. The second pipe is also buried.

Thank You

Kirk Nicholes
