Unfortunately what gets reclaimed does not follow the pit bond release polygons, but rather follows Drawing 5-38 and the areas that the mine can get soiled for me. I've quickly put together drawings for the NPL and SPL showing the reclamation in relation to the pit bond release polygons to show what I mean. What has been seeded this fall is:

North Private Lease -LAS-16, LAS-17, LAS-18, LAS-20, LAS-21 Subsoil Pile #2 and Topsoil Pile #2(face that soil has been removed from)

South Private Lease -LAS-1, Topsoil Pile #1 and Subsoil Pile #2. We also reseeded around Pond 5 with the interim mix that did not take very well last spring

The shape that I've drawn for SPL LAS-1 is approximate as I have not surveyed it yet

Kirk,

Is the following accurate:

Areas seeded in November 2016 in the South Lease included:

the reclaimed Lower Robinson Creek Diversion

Subsoil pile #2

Topsoil pile #4 **2**

bond release areas Pit 9B, HWT1B, HWT 1A, HWT2A, HWT2B, HWT 3B, south fenceline haul road across reclaimed pits 1B, 2, 4, 7, and 8.

Areas seeded in November 2016 in the North Lease included:

the topsoil pile

the subsoil pile

reclaimed bond release areas Pits 1-3

Outside the permit area:

North Lease County road berm

Hello Priscilla,

Here are the tags from the seed mixes we have used this year.

Thanks
