Kirk Nicholes Resident Agent  
Alton Coal Development, LLC  
463 North 100 West Suite 1  
Cedar City, Utah 84720

Subject: Phase I Bond Release Final Approval, Coal Hollow Mine, C/025/0005, Alton Coal Development, LLC, Task #5504

Dear Mr. Nicholes:

The Division finds that Alton Coal Development, LLC has met the regulatory requirements for Phase I bond release for areas BRP 1-11 and BRP1-12. Enclosed is the Division's Decision Document for the Phase I bond release. A copy of the bond release inspection report is included in this package along with the documentation of events and the Division's Findings.

The Division hereby approves the Phase 1 bond release in the amount of \$2,130,418 on approximately 30.429 acres. No actual bond money is being released with this action as it will be applied to future disturbance. The Division continues to hold bond in the amount of \$12,750,000 to ensure the remainder of the reclamation work.

You will need to return clean copies of the bond release application for incorporation into the approved Mining and Reclamation Plan. Please submit these by October 27, 2017. Thank you for your help during this process. If you have any questions, please call Daron Haddock at (801) 538-5325.

Sincerely,

John R. Baza  
Director

## DECISION DOCUMENT

Phase I Bond Release on 30.429 acres  
Alton Coal Development, LLC  
Coal Hollow Mine  
C/025/0005  
Kane County, Utah

### ACTION

Phase I bond release is requested for 30.429 acres in the disturbed area boundary at the Coal Hollow Mine. The current bond for the Coal Hollow Mine will remain at \$12,750,000.

### BACKGROUND

The Alton coal field is located in T39S, R6W and T39S, R5W SLB&M, Kane County, Utah. The town of Kanab, which is the Kane County Seat, is located about 30 miles south of the Alton coal field. Alton Coal Development, LLC (ACD) is the company responsible for the development of a portion of the Alton coal field which is known as the Coal Hollow Mining Project. The center of the Coal Hollow Project (CHP) is located approximately 3 miles south of the town of Alton, Utah.

In 2004, ACD negotiated surface and coal leases for the private or fee areas of the Alton coal field. In 2004 ACD submitted a Lease by Application (LBA) to the Department of the Interior, Bureau of Land Management State Office, Salt Lake City, Utah for federal coal acreage contiguous to the secured private lease area. Starting in 2006, ACD submitted an application for a mine permit along with a Mining and Reclamation Plan (MRP) to the Utah Division of Oil, Gas and Mining (UDOGM). It took until November 8, 2010 to complete the permitting process and the Division issued a permit for the Coal Hollow Mine.

The Coal Hollow Project started as a surface mining operation that intended to produce approximately 2,000,000 tons of coal annually using pit mining. Midway through the project, ACD initiated highwall mining which was used in a portion of the mine. Recently, the Company has instigated underground mining, which is still being developed. Production at the mine has been much slower than anticipated.

A permanent program permit was issued to Alton Coal Development, LLC for the Coal Hollow Mine on November 8, 2010. An enlargement of the mine (known as the North Private Lease) was approved by the Division on February 2, 2016.

As is typical with most surface mines, reclamation is occurring concurrent with mining operations. Backfilling of the pits and regarding the surface occur shortly after the coal is removed. Up to this point, Alton Coal Development, LLC has achieved Phase I bond release on 4 different parcels totaling 165 acres. This action will release Phase I bond on another 30.429 acres for a total of 195.429 acres of Phase I bond release.

## **CHRONOLOGY FOR PHASE I BOND RELEASE**

August 3, 2017	Alton Coal Development, LLC submits the Phase I bond release application.
August 18, 2017	The Division sends letters of invitation for the bond release inspection to be held August 29, 2017.
August 3, 10, 17 and 24, 2017	Phase I Bond Release Published in the Southern Utah News
August 29, 2017	Phase I bond release inspection.
September 24, 2017	Comment period ends. The Division receives no comments other than a letter of support from Kane County.

### **SUMMARY OF FINDINGS**

The Phase I bond release was advertised for four consecutive weeks. The only comment that was received during the public comment period was from Kane County who expressed support for the bond release going forward. A bond release inspection was conducted on August 29, 2017. No problems were identified. The technical analysis for Phase I bond release is attached.

### **PHASE I BOND RELEASE RECOMMENDATION**

The recommendation is that the Division approve the Phase I bond release for the requested area. The Permittee has applied for a bond reduction in the amount of \$2,130,418 for the disturbance in the 30.429 acre area. The posted bond will remain at \$12,750,000, which will allow the mine to roll over the excess bond amount for future disturbance.

## Technical Analysis and Findings

### Utah Coal Regulatory Program

September 25, 2017

**PID:** C0250005  
**TaskID:** 5504  
**Mine Name:** COAL HOLLOW  
**Title:** PHASE I BOND RELEASE

### Reclamation Plan

#### Bonding Determination of Amount

*Analysis:*

The amendment meets the State of Utah R645 requirements for Determination of Bond Amount.

This application proposes Phase 1 Bond Release pertaining to two different areas on the Permit Area. In the North Private Lease, former pits 4, 5, and 6 comprising 16.251 acres have been reclaimed to final grade, subsoil placed, and drainage control established. In the South Private Lease, former pit B1 has achieved final grade, subsoil placed, and shaping for drainage control established. On August 29th, several agents from the Division met at the mine site and collaborated with mine personnel regarding the progress of reclamation efforts. A walking GPS survey was conducted by several Division staff to confirm area measurements, and numerous photos were taken documenting successful earthwork and revegetative efforts on site.

This Phase 1 bond release application is proposing a liability reduction of \$2,130,418 from the current disturbance liability of \$11,816,451, although the current bond for the Coal Hollow Mine will remain at \$12,750,000.

#### Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The purpose of this site visit was to conduct phase I and II bond release inspections on portions of the Coal Hollow mine. Persons in attendance not listed in the representatives section of this report included; Byard Kershaw, Kane County Natural Resource Specialist, Jim Matson, Kane County Commissioner, Mike Asch FWS Biologist (Sage Grouse), Mark Boshell, Atty for PLPCO and, Dr. Nicole (Nicki) Frey, USU Extension Sage Grouse research.

A Bond Release inspection at the Alton Coal Mine was conducted by Division hydrologist, Keenan Storrar, on August 16, 2017 with Kirk Nicholes as the company representative. [KS]

**1. Permits, Change, Transfer, Renewal, Sale**

On August 2, 2017 the Division received applications for phase I and II bond release on portions of the Coal Hollow mine. The applications included:

**2. Signs and Markers**

The staked bond release areas were walked and documented with gps. The resulting map is attached.

**4.a Hydrologic Balance: Diversions**

Diversions in the South Private lease need to be repaired. Ditch B-1T-U and Ditch B-1T-L along the western and northern perimeter of Pit B-1 need to be repaired. During the inspection this ditch had been disturbed by the reclamation work of Pit B-1 and was no longer functioning as designed. The ditch must be graded so runoff from B-1 disturbed area reports to Pond 3. [KS]

**4.b Hydrologic Balance: Sediment Ponds and Impoundments**

The Phase II Bond Release area BRP2-1 across Pits 3, 5 and 6 adjacent to Lower Robinson Creek has been successfully revegetated. A large portion of this area has been vegetated for over three years. The surface of the bond release area appears to be stable with little to no rilling or gulying. [KS]

The Phase II Bond Release area BRP2-2 in the South Private lease has been successfully revegetated. The area of Pits 22 – 28, SURF6 and SURF7 has two years of vegetative growth stabilizing soil across the reclaimed surface. The stabilized area will prevent erosion and subsequent contribution of suspended solids to runoff outside the permit area. [KS]

There is very little erosion and subsequent suspension of sediment occurring in the southern end of the South Lease. Pond 4 discharged three times during spring runoff in 2017. The Total Suspended Solids ranged from a low of 208 to a high of 558 mg/L. This is less than half the daily allowable maximum of 1200 mg/L. At the inlet to Pond 4 there appears to be very little to no sediment deposited as runoff feeds into the pond. The low TSS values and little accumulated sediment in Pond 4 shows vegetation has been adequately established to stabilize the Phase II bond release area. [KS]

The remaining areas in Watershed 4 of HWT 2-A, HWT 2-B, HWT 3-A, HWT 3-B have one year of successful vegetative growth and Pit 21-B and SURF 5 have over two years of successful revegetation. These areas will need a minimum of two years of successful vegetative growth prior to the removal of Pond 4. [KS]

## **12. Backfilling And Grading**

The phase I application included 30.429 acres that had been backfilled and graded and topsoiled. Seeding will be completed in the Fall of 2017.

The Phase I bond release areas meet the hydrologic requirements needed for bond release. The areas BRP1-11 and BRP1-12 were inspected. The backfilled and graded areas match the surrounding terrain. Both areas are sloped to properly drain runoff and the edge of backfilled areas seamlessly join to the surrounding undisturbed terrain. The backfill in both bond release areas consists of Tropic Shale. This backfill material is not considered to be of hydrogeologic importance due to its low conductivity. Therefore, it is not anticipated any groundwater of importance will recharge to the bond release areas. [KS]

## **13. Revegetation**

The phase II application included 77.431 acres of reclaimed disturbance that has been seeded and the vegetation is established. This is supported by quantitative and qualitative sampling. The current percent cover and species composition of the vegetation is approximately 66 % of that in the reference areas for sagebrush grass and pinyon/juniper. These areas are not showing any signs of soil loss or erosion.

**PUBLIC NOTICE  
PHASE 2 BOND RE-  
LEASE APPLICATION  
COAL HOLLOW MINE,  
ALTON COAL  
DEVELOPMENT, LLC**

Public Notice  
Phase 2 Bond Release Ap-  
plication  
Coal Hollow Mine (CHM)  
Alton Coal Development, LLC  
463 N 100 W, Suite 1  
Cedar City, UT 84721  
MSHA # 42-02519  
Permit # C/025/0005  
Permit Approval 11/08/2010

Notice is hereby given that Alton Coal Development, LLC has filed an application with the Utah Department of Natural Resources, Division of Oil, Gas and Mining for Phase 2 Bond Release on approximately 77.431 acres of the Coal Hollow Mine ("CHM" or the "Reclaimed Coal Mine").

All areas for bond release have met the standards of the Utah Coal Program as to the vegetation and water quality requirements for Phase 2 Bond Release (refer to R645-301-880). The locations of the Reclaimed Coal Mine areas in Kane County, Utah are as follows:

BRP2 - 1 - A portion of the CHM within the SE 1/4, SE 1/4 of Sec. 19, and the NE 1/4, NE 1/4 of Sec. 30 T39S, R5W containing 25.814 acres. BRP2 - 1 includes the former Pit 3, Pit 5 and Pit 6 of the South Private Lease. Phase 1 bond release was approved for this area on November 9, 2015. Topsoil (approximately 8") was placed in the fall of 2013, 2014 and 2016 for various portions of BRP2-1. The Lower Robinson Creek stream channel, diverted during mining, was reconstructed to its original location with 15" D50 rip-rap placed to a depth of at least 24" along the flow path in September of 2015. Straw mulch at a minimum of 1,500 lbs./acre and Nutri-Mulch® at a minimum of 1,500 lbs./acre was placed soil surface. Following top soiling and mulching, the prepared portions were seeded in October of 2013, November and December of 2014 and March of 2016.

BRP2 - 2 - A portion of the CHM within the E 1/2, E 1/2 of Sec. 30 T39S, R5W containing 51.617 acres. BRP2 - 2 includes the former Pit 21A, Pit 21B, Pit 22, Pit 23, Pit 24, Pit 25, Pit 26, Pit 27, Pit 28, Surface 6 and Surface 7 of the South Private Lease. Phase 1 bond release was approved for this area on November 9, 2015. Topsoil (approximately 8") was placed in the fall of 2014, 2015 and Spring of 2016 for various portions of BRP2-2. Straw mulch at a minimum of 1,500 lbs./acre and Nutri-Mulch® at a minimum of 1,500 lbs./acre was placed soil surface. Following top soiling and mulching, the prepared portions were seeded in November of 2014, December 2014, January 2015 and March of 2016.

The Phase 2 bond release application is for a liability reduction of \$322,110 from the current disturbance liability of \$12,730,495. The current bond for Coal Hollow Mine will remain at \$12,750,000. All of the above-described areas within the Reclaimed Coal Mine meet the requirements of the MRP and the Division's regulations for post mine land use and for backfilling, regrading and drainage control standards.

A copy of the Phase 2 bond release application with the complete legal description for each area may be examined at the office of Division of Oil, Gas and Mining, 1594 West North Temple, Suite 1210, Salt Lake City, Utah 84114-5801 and written comments, objections, or requests for an informal conference may be submitted to the Salt Lake City address. Said comments must be submitted thirty (30) days from the date of the last publication of this notice. This notice is being published to comply with the Surface Mining Control and Reclamation Act of 1977, the Utah Coal Mining and Reclamation Act and State and Federal regulations promulgated pursuant to said Acts.

Published in the *Southern Utah News* August 3, 10, 17 and 24, 2017.

Daron Haddock  
Division of Oil, Gas and Mining  
1594 W. North Temple, Suite 1210  
Salt Lake City, UT 84114-5801

Dear Mr. Haddock:

On August 29, 2017, Kane County Commissioner Jim Matson and I (Byard Kershaw) attended the field trip to observe the areas for both Phase I and Phase II bond release at the Alton Coal Development, LLC (ADC) Coal Hollow Mine.

Following the meeting at the mine office and the field tour of the reclaimed areas, the Kane County Board of Commissioners agrees that the requirements of the Phase I and Phase II bond release requirements have been met. We are in agreement that the reclamation bonds as described by your office and ACD employees have been met and that the bonds should therefore be released.

As was discussed by Larry Johnson, ACD mine manager, the released funds will be applied to the bonds for future reclamation projects. We find this action shows ACD's commitment that the disturbed areas of the mine property will be reclaimed to the standards established by the Utah Division of Oil, Gas and Mining, and the Mine Safety and Health Administration.

If you have any comments or questions please contact Byard Kershaw by phone at 602.478.9621 or by email at [northrimconsulting@kanab.net](mailto:northrimconsulting@kanab.net).
