Hello Keenan,

I think there is a ghost in the system. Somehow the SW-1M sample for the 4th quarter 2018 was kicked back to the pipeline. It shows up on our end of the database interface now, but I can't edit or mark it as ready for update. The sample was previously marked as ready for uploading on our end and passed all edits, so I'm not sure how that happens. Let me know what you want me to do on that sample. I don't think I can even delete the sample that is showing up in the database presently.

Regarding the Alkali Seep sample, I'm not sure what happened with that sample. I have now re-entered that information and the newly entered sample is now marked as ready for the Division to upload.

Thanks Keenan,  
Erik

Hi Erik and Kirk,

I'm going over Coal Hollow's water monitoring data for the 4th quarter of 2019. There is missing data that needs to be entered into the database. I've listed the sites below:

Spring:  
Alkali Seep

Stream:  
SW-1M

Let me know when you get these uploaded.

Thanks,
