Hi Kirk,

I'm following up to see if you've entered these data into the Water Monitoring Database yet?

Also, I've added Pond #7 outfall to the database. Please enter your data for it under the following site ID:

<input checked="" type="checkbox"/>	7 -UPDES	UTG040027-007	Q from Pond #7 to Kanab Ck, NPL	287
-------------------------------------	----------	---------------	---------------------------------	-----

Thanks,

Hi Kirk and Erik,

I'm going through Coal Hollow's water monitoring for the 2nd quarter of 2018 and the following data needs to be uploaded:

Stream site:

SW-8

Wells:

NLP-6

NLP-7

Y-102 has an incorrect depth measurement. Let me know the depth and I can correct it.

The water monitoring program should be updated to reflect if these sites are no longer functioning. Also, all of the mined through sites should be removed from the program as well including Coyote seep, NPL-10 etc.

Thanks,

Keenan Storrar
