RE: Status Update Coal Hollow, C025/005

The permittee conducted the following work at Coal Hollow.

- Haul and access roads have been re-graded a couple of times since the last DOGM inspection. Roads should not need maintenance until the next major rainstorm.
- The Northwest spoil pile at the North Lease has been put into the Northern Pits.
- Sediment ponds are in good shape and a first quarter quarterly inspection was on March 25, 2020 with no hazardous conditions reported.
- Quarterly spoil pile inspection was also on March 25, 2020 by Dan Guy and P.E. Certified with no hazardous conditions noticed.
- Pit 10 is completely reclaimed.
- Sediment pond # 7 is used for watering the roads and Sediment pond #3 will shortly be used for an additional road watering location.
- Coal Hollow will be submitting an operator response to appendix 9-1 "Prime Farmland Soils" Task #6066.
