Memo to File:

Re: Southern Utah Fuel Company  
Convulsion Canyon Mine  
Sevier County, Utah  
ACT/041/002

On June 15th 1977, Brian Buck accompanied Mr. Ralph Blumer (USGS) and Mr. Roland Heath (SUFCO) in an inspection of the Convulsion Canyon Mine. The tour included observations of exploratory drilling, conventional and continuous first mining sections, a continuous second mining section, various roof support installations, and completed second mining in one panel that had caved and one panel that had not yet caved.

Mr. Heath informed Brian that surface measurements over the one left, one west panel had detected subsidence. The measurements were being made on a monthly basis.

BRIAN W. BUCK *BWB*  
ENGINEERING GEOLOGIST
