Inspection Memo
to Coal File:

RE: Convulsion Canyon Mine
ACT7041/002
Sevier County, Utah

The above mentioned operation was given a partial inspection on April 24, 1980 by Joe Helfrich from the Division. He was accompanied by Kerry Frame, Mine Engineer for the Convulsion Canyon Mine.

The filters on the sediment catchment basin apparatus have been changed from 5 microns to 50 microns. The mine water discharge has been cleaned up since the implementation of a new sump pump in the mine which transfers water from the low lying area to the main mine water storage area.

No violations were issued.

JOSEPH C. HELFRICH
RECLAMATION OFFICER
