RE: Abatement of NOV  
#80-1-13-2  
Southern Utah Fuel Co.  
Convulsion Canyon Mine  
ACT/041/002  
Sevier County, Utah

Dear Mr. Frame:

As you were not available for the last inspection, I am sending you this letter with enclosures for your information.

Upon receipt of the preliminary studies in the Dames & Moore stability report, Violation #1 (80-1-13-2) is hereby terminated as of January 30, 1981. You are required to address the performance standards for a Class III road contained in UMC 817.170 and the stipulations in the approval letter for the drainage facilities and sediment control plan dated August 27, 1980. More information is still needed as discussed with Lee Spencer on January 9, 1981.

The abatement deadline for Violation #2 (80-1-13-2) has been extended to February 15, 1981, to establish a ditch and silt fence around the topsoil stockpile as described in Allon Owen's letter to the Division dated January 15, 1981. Enclosed is a copy of that letter for your records. You are required to implement all abatement measures as described in this letter by the abatement deadline. Please read the February 5th Inspection Memo enclosed for other areas that were not addressed as required in your approved plan for abatement.

If you have any questions, please call.

Sincerely,

JOSEPH C. HELFRICH  
RECLAMATION SOILS SPECIALIST
