Memo to Coal File:

RE: Coal & Salt and Sand Storage  
Modification  
Convulsion Canyon Mine  
ACT/041/002  
Sevier County, Utah

On December 8, 1982, Susan Linner of the Division had a telephone conversation with Kerry Frame of Sufco, dealing with a proposed minor modification submitted November 16, 1982. The proposal requests approval to construct a salt and sand storage area, a stoker coal storage area and to enlarge the lump coal storage pad.

During the conversation, approval was given to begin work on the salt and sand storage area and the lump coal storage pad. The stoker coal storage area was not approved at this time due to concerns of Division hydrologists and employees of the State Division of Environmental Health over oil that will be sprayed on the stored coal. A formal statement from the Division of Environmental Health is expected by the end of the week.
